Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4,6-18,20-24,28-38,41,42,45,46,57,58 and 60-62 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The above claims all claim limitations regarding the specific sealed PTFE film and elastomer balloons burst pressures and/or compaction ratios, the specifics of which were not detailed or supported in or by the original specification. Specific examples of balloons with all of the claimed characteristics were not provided.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 3761

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4,6,7,25,28-33,56 and 59 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 5,868,704. Although the conflicting claims are not identical, they are not patentably distinct from each other because the balloon being sealed would be obvious to allow the balloon to hold the inflation medium; and the balloon having the claimed burst pressures would have been obvious as it is clearly above 5 atm, given claim 5 of the -'704 patent, and claiming over 8,10 and 15 would be obvious to provide a merely stronger balloon for placement in the body where higher inflation pressures are necessary.

The use of the balloons for various procedures is considered obvious in that balloons are notoriously well known in the art to deliver stents or grafts.

Response to Arguments

Applicant's arguments filed 01-30-04 have been fully considered but they are not persuasive.

The examples in the applicant's specification cited by the applicant in the response do not support the claimed subject matter. Examples of 10 atm., 19.5 atm., 22 atm., 21 atm. and 15 atm. and compaction ratio .94, .64, .86, .90 and .96 do not support claim limitations of "at least about 5,8,10 and 15 atm" or compaction ratios of "at least about .5 and .6". See *In re Wertheim*, 541 f.2d 257, 191 USPQ 90 (CCPA 1976). The

Art Unit: 3761

phrase "at least" has no upper limit and causes the claims to read literally on embodiments outside the disclosed parameters.

No terminal disclaimer is in the file accompanying the last response of 01-30-04, and therefore, the double patenting rejection has not been overcome.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
